

Andrew J. Scutti

Dale Corporation, Dale Construction and Affiliates

Personnel Qualifications

Experience **March 1999–Present**

Director of Safety and Health

Responsibilities include the development, management and implementation of the Safety, Health and Environment Program for General Construction and specialties of Carpentry and Drywall work. This consists of the equilateral controls of Safety, Quality and Production through on-site inspections, implementing directives, abatement of unsafe conditions, educational classes, accident investigations and the overseeing of the case management of injured workers. Goals as the Safety Director are to eliminate unsafe working conditions and to educate employees for competency of a safe work place and work ethics by promoting and implementing the highest standards for construction. In addition to reduce the experience modification rate and to get injured workers back expeditiously to their pre-injury positions. By creating relationships and cooperation from the building trades, local OSHA offices and regional safety councils, we have the ability to communicate, eliminate, resolve and pre-plan concerns of Safety and Health on our projects prior to the exposure of the potential hazards. This responsibility has developed into an overall Risk Management position for all divisions of the Company, including consorted efforts and representation with legal counsel services for protecting the workers and the Company, including the management of the insurance programs and policies.

The accomplishment of this position is the influence for successful effectiveness of creating Safety and Health as part of the culture for this dynamic organization.

1995-Present

Project Management

Responsibilities include management of General Construction, Construction Management, Scheduling, Contracting, Quality Control, overseeing entire project from start to finish, including Warranty work. Federal and prevailing wage comprehension and reporting. Currently responsible for Special Projects Division which entails all the aforementioned with the sensitivity of special clientele.

2004-Present

Property Management

Responsibilities include the overall management of the real estate owned by the Company and its Affiliates. This includes but is not limited to, marketing, leasing, tenant relations and maintenance. Most recent is the oversight of the Property Manager for a 67 unit senior housing facility and large medical office tenant.
